
PROJECT DESCRIPTION

The whole project is developed using basic HTML and CSS. Structure of the page is designed using HTML tables. Home page bio image is present in the repository, rest all the images are online web links. All the text decoration and coloring is done in CSS. About page is designed and structured using nested tables. Un-Ordered lists are used to add bullets in the portfolio. Gallery page has images of portfolio. Contact page is also structured using HTML tables, it has contact information including address, phone number and email address. It also has contact form, which is obtained from an online website. (i.e. <http://www.freedback.com/>).
